Pioneers in Organic Nutrition Since 1957

For more than 65 years, Lima has been dedicated to creating wholesome, organic foods with the philosophy of "better for you and good for the planet."

Founded in Belgium, and rooted in the macrobiotic principles introduced by Georges Ohsawa, Lima has played a pioneering role in shaping the organic food movement. We were even involved in the early development of organic legislation in Europe.

At Lima, we believe that a plant-based lifestyle not only supports your health but also protects our environment. Our products are 100% organic and made from natural, minimally-processed ingredients, carefully selected to nourish your body while respecting the earth.

Our Commitment to You and the Planet

At Lima, sustainability is about more than just producing organic food - it's about ensuring a future where both people and the planet can thrive. This means constantly improving our processes, reducing our environmental impact, and choosing the most responsible ways to produce and package our products.

Natural Ingredients:
We prioritise using minimally processed ingredients that are 100% organic, GMO-free, and pesticide-free.

Transparency:
We believe in being open about what's on your plate - no additives, no hidden ingredients.

Sustainable Packaging:
We continue to push for more eco-friendly packaging solutions, aiming for 100% recyclable or compostable materials.

Belgian Innovation Meets Japanese Philosophy

Lima's journey is a fusion of Belgian innovation and Japanese philosophy. Rooted in macrobiotic principles introduced by Georges Ohsawa, our approach emphasises balance, respect for nature, and mindful living.

From the beginning, our founder Pierre Gevaert infused this philosophy into Lima's product range, combining the simplicity of Japanese culinary traditions with the innovation of European organic practices. Whether it's our plant-based drinks, condiments, and coffee alternatives, each product is crafted with care to nourish both body and mind.

This East-meets-West approach has led to the creation of some of Europe's most iconic plant-based products - like Lima's rice drink, the first Rice Drink in Europe.

Organic today: easy and accessible

At Lima, it's not just about balance. It's also about having fun!

We know the needs of our consumers and we want to be closer to them every day. That's why we offer a range that meets all your desires. A new way of cooking and embellishing your plates easily, in all simplicity. The Lima touch to enhance your favourite dishes!

Most importantly, we create products that fit your needs, preferences, and lifestyles. We evolve for you and with you. We believe in supporting those who choose to make responsible choices. To support you. Every day, every moment.

Lima and the Planet: Organic with Nothing to Hide!

At Lima, we believe that changing the way we consume is crucial to addressing the challenges our planet faces. That's why protecting the environment is at the heart of everything we do. For over 65 years, we've been committed to producing **100% organic**, plant-based products that align with our values of sustainability and transparency. We strictly adhere to European regulations: **no additives, no GMOs, no pesticides**, and we proudly

carry the French AB and Belgian Biogarantie labels. Our commitment we work with trusted partners and rigorous third-party testing to ensure every product meets the highest standards. Because for us, transparency and integrity are non-negotiable. We go the extra step to ensure that our products not only taste good but also help build a more sustainable world—one bite at a time.

Responsible... Even with our packaging!

Our packaging is made up of a minimum of 94% bio-based materials.

Nowadays, packaging can have an impact on the environment and create pollution... That's exactly why we aim for 100 % in the future. Our ecological approach is growing, along with our product range!

At Lima, we use the most environmentally friendly materials whilst taking care to preserve your favourite products.

Three types of Eco Pack

BIO BASED

Partially plant-based packaging

COMPOST HOME

Home compostable packaging

COMPOST INDUSTRIAL

Industrially compostable packaging

Tea & Coffee Substitutes

Chicory is a herbaceous plant with light purple flowers and edible roots, which is part of the chicory family. The root (which is roasted and ground) contains lots of good and healthy properties to create a perfect coffee substitute. Chicory has a wonderful aroma and does not contain caffeine. The day starts just as nicely with chicory or our classic Yannoh with the delicious taste of roasted grains and guaranteed gluten-free.*

Noodles

Our fine Japanese noodles are made with the most care according to ancient local traditions. Ready to eat in 3 to 10 minutes! Although our noodles are made from whole grains, they are very light. The secret: flour that is ground several times and dried in the open air. The Soba 100% noodles have a gluten-free certificate and are made from whole grain buckwheat flour without added salt.

Japanese Noodles

66820 • Udon (traditional pasta from whole grain wheat)

Whole grain WHEAT flour*, sea salt.

Other Condiments

Lima’s condiments are full of natural richness, vibrant colour, and exceptional taste, making them indispensable in kitchens around the world. From Gomasio to Tahin and Kuzu, these versatile seasonings enhance a wide variety of dishes. Easy to use and packed with flavour, they are a staple in global cuisine. Our range is regularly updated to meet changing consumer preferences, ensuring freshness and variety each year.
